An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

At page 1, line 25 after "2001" insert now US Patent 6562142, 13 May 2002--.

The following is an examiner's statement of reasons for allowance: The instant application is drawn to a surface coating film (coherent layer) comprised of nonphotoactive nanoparticles. The independent claims require the amount of nanoparticles be less than 3 microgram/cm² (claim 1) or have a water content of less than or equal to about 4% (claim 24). Anticipation requires that a product be more than unwittingly produced by artisans attempting to produce other products and different results, *Tilgham v. Proctor*, 102 U.S. 707. McCarthy is the most relevant prior art of record. In the appeal brief filed applicant submits a new argument and supporting evidence that the disclosure relied upon by the examiner includes an obvious typographical error the correction of which makes the disclosure nonanticipatory. The prior art of record does not teach or suggest films having less than 3 micrograms/cm² nonphotoactive nanoparticles, nor does it teach or suggest that residue free films are observed thereby. With regard to instant claim 24, applicant present new evidence from the relevant art persuasively supporting the contention that the term "dry" alone in the reference fails to disclose a film having up to about 4% moisture. The brief establishes that within the relevant field of art the term "dry" is relative in context. The prior art fails to teach or suggest the limiting the moisture content of the film to the range of 0-4% engenders films having an "unexpectedly high durability" as disclosed in the

instant specification. The requirement for election among species is withdrawn. Claims 1-12, 24 and 25 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
